APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions.

This temporary permit to change the point of diversion of a portion of the waters of an underground source as heretofore granted under Permit 62198 is issued subject to the terms and conditions imposed in said Permit 62198 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This temporary permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The well must be sealed with cement grout, concrete grout or neat cement from ground level to 100 feet.

The total combined duty of water under Permits 62197, Certificate 15564; 62198, and Temporary Permit 67739-T shall not exceed 62.56 acre-feet for the irrigation of 15.64 acres within the described place of use.

The issuance of this temporary permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

This temporary permit is issued pursuant to the provisions of NRS 533.345 Section 2 and will expire on **August 30, 2002** at which time all rights herein granted shall revert to the right being changed by this temporary permit.

(CONTINUED ON PAGE 3)

Page 3 of 3 (PERMIT TERMS CONTINUED)

Temporary Application to Change Point of Diversion of A Portion of Permit 62198

No. 15 - Remarks:

The Applicant has recently acquired the property to which the subject right, and others, are appurtenant and has been attempting to fully utilize the permitted duty including re-planting those areas within the place of use that have not yet been established with a beneficial use. During the Applicant's efforts, it has pumped the existing well to its full capacity causing cavitation within the well without realizing the full permitted diversion rate or duty.

At this time, to salvage the Applicant's efforts to date and fully utilize the permitted duty, it is necessary to drill and equip a new irrigation well; the existing well will continue to be utilized to its existing capacity. Once complete the new well will be sufficient to allow the full permitted duty to be realized.
